

Please do NOT prohibit satellite radio from providing local weather and traffic! To know I can turn to a station on the radio and get instant traffic reports is of great importance to me.

I can't begin to count the number of times I would be stuck in traffic in the past and had to wait an endless amount of time for a traffic report from the local stations. Inevitably I would tune into a local station just after the traffic report and have to either find another station or wait ten minutes for the next report. When your normal commute time is an hour or more, ten minutes stuck in traffic not knowing what's going on can be a very long time.

This is a great service that satellite radio provides. I'll be taking a driving vacation of 2 1/2 weeks and the instant traffic reports will be very valuable.

Respectfully,

Lynne Caldwell
